PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, Tableau, and Power BI for transforming datasets into actionable business insights. Skilled in exploratory data analysis, statistical modeling, data cleaning, and building interactive dashboards that drive decision-making. Proficient in the full analytics pipeline—from data preprocessing and feature engineering to predictive modeling using pandas, NumPy, and scikit-learn. Experience building end-to-end data solutions and deployment-ready analytical systems. Strong foundation in Data Structures & Algorithms with proven problem-solving capabilities. Passionate about developing scalable, data-driven solutions with measurable real-world impact.

EDUCATION

Bachelor of Technology (Computer Science)	2024 - 2028
Newton School Of Technology, Rishihood University	Grade: 7.4/10.0
Intermediate (Class XII)	2023 - 2024
MG Convent School	Grade: 78.8%
Matriculation (Class X)	2021 - 2022
Lucknow Public School	Grade: 92.3%

PROJECTS

F1 Sponsorship and Investment ROI Analytics Dashboard ([Github](#)) ([Demo](#))

April 2026

- Analyzed 5,000+ F1 sponsorship records to evaluate investment performance, brand visibility metrics, and ROI across teams, sponsors, and circuits
- Performed comprehensive data cleaning, transformation, and exploratory data analysis to identify sponsorship trends, high-value partnerships, and underperforming investments
- Built an interactive Tableau dashboard featuring executive KPI summary and operational drill-downs to visualize sponsorship distribution, revenue impact, and team-level investment patterns
- Identified key ROI drivers including race performance correlation, sponsor category effectiveness, and geographic market penetration, enabling data-driven sponsorship allocation strategies
- Delivered 8+ actionable business insights and strategic recommendations to optimize sponsorship portfolio allocation and maximize brand exposure per investment dollar

Employee Health & Productivity Analytics Dashboard ([Github](#)) ([Demo](#))

February 2026

- Analyzed 10,500+ employee health records to identify critical relationships between stress, sleep patterns, work hours, and productivity performance across 5 departments
- Performed comprehensive data cleaning, standardization, and feature engineering to create health risk categories, sleep buckets, and workload segmentation for targeted analysis
- Built an interactive Google Sheets dashboard with pivot tables, KPI scorecards, and dynamic slicers to visualize productivity drivers, risk segments, and departmental health trends
- Discovered strong correlations: Stress vs Productivity (-0.81), Sleep vs Productivity (+0.77), identifying that 36% workforce faces sleep deficit and 33% experiences high stress levels
- Delivered 6 data-driven HR recommendations including stress management programs, workload control policies, and sleep hygiene initiatives, with projected 10-15% productivity gain potential

CERTIFICATIONS

Complete Generative AI Course With Langchain and Huggingface Udemy ([Link](#))

June 2025

Completed Generative AI certification with LangChain and HuggingFace, gaining practical experience in LLM workflows, prompt engineering, embeddings, vector search, RAG pipelines, model deployment, and real-world AI application development.

SKILLS

Computer Languages: Machine Learning, HTML, SQL

Data Tools: NumPy

Software Packages: Pandas, Excel, MySQL

Additional Courses: Data Structure

Soft Skills: Public speaking, Verbal/nonverbal communication, Written communication, Openness, People skills, Communication Skills

Others: Tableau, Git and Github, LLM, Generative AI, OpenAI API, GenAI, LangGraph

EXTRA-CURRICULAR ACTIVITIES

- **Vice President, AI Club:** Led sessions on Python, Deep learning and Generative AI.
- Collaborated in a cross-functional team to diagnose a real business problem and drive data-backed strategies that improved a restaurant's morning online sales performance.
