SUMMARY

Data Analytics & Visualisation student at Newton School of Technology, proficient in Python, SQL, and Tableau. Experienced in building end-to-end data pipelines, performing statistical analysis, designing KPI frameworks, and delivering interactive dashboards that support evidence-based business decision-making.

TECHNICAL SKILLS

Languages: Python, SQL

Libraries: Pandas, NumPy, Matplotlib, Seaborn, SciPy, Scikit-learn

Visualisation: Tableau, Google Sheets (Pivot Tables, Dashboards), Excel

Analytics: EDA, Statistical Analysis, KPI Design, Data Cleaning & ETL, Regression, Hypothesis Testing

Other: Git, GitHub, Jupyter Notebooks, Google Colab, Kaggle

PROJECTS

F1 Constructor Sponsorship & Investment ROI Analytics | [GitHub](#) • [Tableau Dashboard](#)

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, SciPy, Scikit-learn, Tableau

- Designed a 5-notebook Python ETL pipeline across 14 raw CSV files (701K+ rows), producing a clean master dataset of 4,626 race records spanning 11 seasons, 20 constructors, 59 drivers, and 32 circuits (2014–2024).
- Engineered a weighted 5-dimension composite Investment Scorecard (points, consistency, momentum, reliability, race craft) using min-max normalisation; identified McLaren as the sole Gold-tier team with a score of 63.02 and +128.95% YoY points growth.
- Validated key findings statistically (volatility–points $R^2=0.28$; pit stop efficiency Cohen's $d=1.26$, both $p<0.001$) and delivered a 3-dashboard Tableau suite covering Investment Scorecard, Risk-Adjusted Portfolio Matrix, and Operational Excellence.

Accelerating India's Renewable Transition – State–Technology Investment Blueprint | [Google Sheets Dashboard](#)

Tools: Google Sheets, Excel, Pivot Tables | **Data Source:** NITI Aayog NDAP (ID 7092)

- Cleaned and analysed 8,576 records across all Indian states and UTs (FY 2006–2020); engineered KPIs including Renewable Share (%), Coal Dependency (%), and Renewable Utilisation (%), revealing only a 2.7 pp RE share gain despite a 6.2% generation CAGR.
- Built pivot-based opportunity segmentation ranking state × technology clusters by untapped potential (UNUSED_POTENTIAL_MW); surfaced Rajasthan (solar) and Gujarat/Andhra Pradesh (wind + solar) as Tier 1 immediate investment priorities.
- Delivered an interactive Google Sheets dashboard with 7 live KPI tiles and 5 interconnected charts — trend, fuel mix, generation vs. potential, utility vs. captive split, and technology comparison — for policymaker and investor decision-making.

EDUCATION

Bachelor of Technology – Artificial Intelligence

Newton School of Technology, Rishihood University | 2024 – 2028 | Grade: 7.7 / 10.0

Intermediate (Class XII)

DAV Public School | 2023 – 2024 | 85.0%

Matriculation (Class X)

DAV Public School | 2021 – 2022 | 89.0%

EXTRA-CURRICULAR ACTIVITIES

- Cricket – District Level
- 1st Year Diploma in Music
