

Priyanshu Tomar

+91 8839691579 | priyanshu.tomar2024@nst.rishihood.edu.in | github.com/r0c0y

Professional Summary

Data Visualization & Analytics student with hands-on experience in Python, Pandas, Excel/Google Sheets, Tableau, and statistics, with experience working on varied datasets including sports performance data, crime records, and structured business-style reporting workflows. Skilled in cleaning messy datasets, defining KPIs, building dashboards that support clear business decisions, and translating raw data into structured analytical reports through exploratory data analysis, trend analysis, and insight-driven storytelling.

Education

Rishihood University, Newton School of Technology

2024–2028

B.Tech. in Computer Science & Artificial Intelligence

GPA: 7.45/10

Technical Skills

Languages	Python, SQL, JavaScript, TypeScript, C++
Analytics	Pandas, NumPy, Statistics, KPI Design, Data Cleaning, Feature Engineering, EDA
Visualization	Tableau, Excel, Google Sheets, Matplotlib, Seaborn, Dashboard Design
Tools	Jupyter Notebook, Git, MySQL, MongoDB
Strengths	Trend Analysis, Correlation Analysis, Report Writing, Business Insight Generation

Projects

F1 Constructor Sponsorship & Investment ROI Analytics

2026

Python, Pandas, Tableau, Statistical Analysis

- Built an end-to-end capstone to rank F1 constructor teams as sponsorship targets using race performance data from 2014–2024.
- Cleaned and transformed 4,600+ records, then engineered features including finish reliability, position delta, and consistency indicators.
- Created a five-KPI investment framework spanning momentum, consistency, reliability, race craft, and operational excellence.
- Validated insights with regression, t-tests, and trend analysis, then delivered a three-dashboard Tableau suite for executive-style decision-making.
- Presented the final recommendation as an investor-focused comparison of constructor performance, stability, and sponsorship value.

Urban Crime Pattern Analysis Dashboard

2025–2026

Excel, Google Sheets, Pivot Tables, Dashboarding

- Analyzed 40,160 crime records across 29 Indian cities to uncover crime concentration, victim vulnerability, and case-resolution trends.
- Prepared a cleaned analytical subset of 7,891 records through category standardization, date cleanup, and derived variables.
- Built pivot-based dashboards and defined KPIs including growth rate, solve rate, and average resolution time.
- Turned raw administrative data into a structured analytical report with actionable safety and policing recommendations.
- Highlighted city-level patterns and resolution gaps to support easier prioritization for reporting and monitoring.

Relevant Coursework

- Data Visualization & Analytics
- Exploratory Data Analysis and Statistical Thinking
- Dashboard Design and Business Reporting
- Data Cleaning, Aggregation, and Insight Communication

Leadership & Activities

- Led an end-term capstone team by coordinating ETL work, report writing, and final project integration.
- Collaborated across analytics, dashboarding, presentation, and report preparation in cross-functional student project teams.

Additional Highlights

- Comfortable working with large, messy, and multi-column datasets to identify patterns, trends, and business-relevant metrics.
- Strong interest in dashboard storytelling, KPI tracking, and converting analysis into clear recommendations for non-technical audiences.
- Comfortable collaborating on end-to-end analytics workflows, from data cleaning and metric design to dashboard delivery and final reporting.
